I didn't even know wtf a GRUB
is, (a Bootloader)
I do now

OWN

even changed
mainboard
battery>:3

➡ so i decide to do a fresh arch* install onto a completely empty drive

 **stopping it will
kill my data**

→ next morning
it luckily finished
successfully

did a fresh arch* install, and could restore my home directory without much trouble.

* still Endeavour ^v _w

Microsoft, and it's decision to push win11 along with copilot deep into my face 🤨 has brought me to the brink

↳ DISGUSTANG

★ so say it with me:
FUCK MICROSL0P! ★

Bazzite Arc!

↳ bazzite is a Linux-distro quite similar to SteamOS

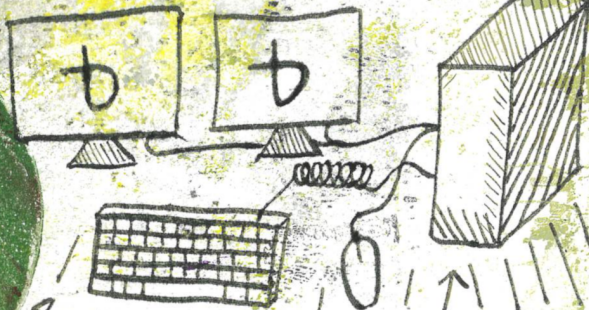

installing bazz was
actually quite easy!

it just works!

:thumbsup:

Amaze

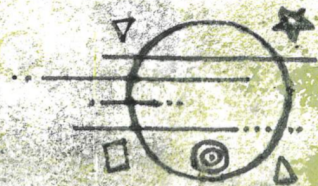

beep
boop

Microsoft
bad!

Computer
good!

YAY

*x0-257-213-099

so i decide that i don't
need bazz anymore

CUZ

i'm using arch btw*

↳ DELETE
BAZZ

↓
ARCH DON'T BOOT
NO MORE

FFFFFFFFF
FFFFFFUUUUU
UUUUUUUUU

*Still Endeavour lol

RACING 2: ELECTRIC BOOGALOO

- o I've Learned a lot 'bout Arch
- o the Issues I had rizzing Bazz are gone
- o Amaze
- o everything is PINK now
- o cute af Icons
- o yay

[Ricing! ☆]

RICING

★ R I need to learn a lot to make shit pretty!

Bazzite uses a read only file system.
That kinda sucks -> makes my ricing more complicated

gimme new distro
pls 🤔

I MESSED AROUND
w/ RAINMETER

IN 2011 A LOT
HOW HARD CAN
IT BE?

BAZZITE IS A FEDORA

- NIXOS
(on a Flashdrive)
- don't ask why
(idk either)
- ????
- profit!
- ↳ took like 2
days, but
kinda works
- runs slow af
oo
o
- not reasonably
usable

gimme new distro
pls

June@June /] \$ sudo woodo
lol

I'm using arch btw*

WHY SHOULDN'T I JUST INSTALL IT ALONGSIDE
BAZZITE?

↳ BOOTLOADER ONLY SHOWS BAZZ :c
↳ FIX BOOTLOADER
↳ WORKS BUT TOOK LONG TO FIX

I'm using arch btw*

*it's Endeavour OS lol
